ALIGNER

How can I start using the ClearSmile Aligner?

To start using the ClearSmile Aligner system you will need to take one of our certification courses. Our courses have been designed to teach practitioners how to use the ClearSmile Aligner system and are required to be a certified user. All aspects of the treatment are covered, from case evaluation to fitting and then retention, so that practitioners will be able to handle simple to moderate cases immediately.

ClearSmile training can be completed online via our training website www.clearsmilealigner.com

What is the ClearSmile Aligner?

ClearSmile invisible aligners are the clear and simple cosmetic solution to realign anterior teeth and deliver the smiles your patients demand. The ClearSmile Aligner is the ideal treatment for mild to moderate crowding or misalignment of the eight anterior teeth.

The ClearSmile Aligner is comfortable, clear and easy to wear. Made from wafer-thin medical grade plastic, the clear aligners are custom manufactured specifically for each patient.

ClearSmile Aligners are worn for one week before switching to the next in the series. Each one incrementally repositions the teeth into the desired position, until alignment is complete.

What does the course cover?

The ClearSmile Aligner course is packed with all the information needed to start providing the treatment immediately. All aspects of the training will be covered from case selection to final retention.

Course outline:

- The ClearSmile Aligner
- Case selection and how to avoid pitfalls
- Arch evaluation, space calculation and space creation
- Fitting, sequencing treatment and retention
- Using the Clearsmile Aligner treatment before other treatments such as bonding and aesthetic restorative dentistry
- Using the Spacewize™ software to allow you to create an accurate prescription to truly control the occlusion

Course benefits

All ClearSmile Aligner certified practitioners will have access to these benefits:

- Find-A-Dentist listing on www.clearsmilealigner.com
- Online case assessment via the ClearSmile Aligner forum
- Access to ClearSmile support and discussion forums
- Access to Spacewize™ – The crowding calculator
- Marketing materials including patient leaflets, posters and case studies
- Online revision course

How do I learn more about the ClearSmile Aligner?

Please visit www.clearsmilealigner.com for more information about the system.
